

Meritor Parts

Meritor Parts - The Meritor Company is a premier global dealer founded upon one hundred years of custom of service and quality. Meritor concentrates on integrated systems with different modules and components to the original machine makers and aftermarket equipment within the transportation and industrial sectors.

Meritor prides itself in the company's unique energy and believes that this energy contributes to their competitive advantage within the worldwide operations. The business values all their clients and wants to guarantee their success while anticipating their various needs. Meritor begins with a philosophy that values diversity of people and their broad thought processes. Operating in 19 nations and hiring over 11,200 people, Meritor promotes collaboration and innovation among a team of knowledgeable professionals.

Meritor strongly believes in only hiring future focused employees. These top-caliber individuals can quickly adapt to changing surroundings and freely demonstrate the level of commitment and performance required to attain results for the competitive market environment. The business empowers their teams to make sound business decisions so as to improve the overall success of the business. In return, Meritor provides their employees various opportunities for personal and professional development.

The Advanced Engineering team is on the forefront of components and system engineering. This comprises drivelines, axles, braking and suspension systems meant for medium and heavy duty trucks, off-highway vehicles, buses, military vehicles and trailers. The Meritor Advanced Engineering team is growing. They opened a new technical center in Bangalore, India in September 2009 to be able to lead their advanced product development initiatives which represent the whole Asia Pacific region. This particular team is even responsible for supporting the requirements of their global engineering personnel.

The Quality team at Meritor is a customer-focused and dynamic group that is committed to ensuring optimum progress at their aftermarket distribution facilities and production plant that are located on 5 continents and in 19 nations.

They have their supplier network that is specially situated in order to support the development of the business. Each regional team has globally supported quality systems, initiatives and centralized in Materials Engineering and Six Sigma. Meritor's growing Six Sigma program encourages a fact-based, data-driven approach to decision making within each aspect of the business. The DFSS or otherwise known as Design for Six Sigma ensures product reliability within every region. The team is even comprised of transactional Green Belts who use Six Sigma tools to business processes and apply lean techniques.
